

Electrical Grounding Series: Part 1

[0m:0s]

[0m:4s] Hi I'm Josh Bloom, welcome to another video in the RSP Supply education series. If you find that these videos are helpful to you, it certainly helps us out if you could give us a big thumbs up and subscribe to our channel.

[0m:16s] In today's video, we are excited to introduce you to a new video series that will focus on electrical grounding.

[0m:25s] Through our experience, we have found that grounding is one of the most commonly misunderstood topics in the electrical world, and for good reason. It can be a very complicated topic and there are a lot of different rules you need to know and follow. It is for this reason that we at RSPSupply.com want to try to simplify this topic.

[0m:48s] While doing this, we hope to share with you all of the important factors that should be considered when setting up your grounding systems, no matter what the application might be.

[0m:59s] By the end of this series, we hope you will have gained a solid foundation of all of the different areas related to electrical grounding.

[1m:8s] Some of the topics that you can look forward to in this series include grounding basics, site grounding, equipment and enclosure grounding, grounding with DC power, as well as several other topics.

[1m:23s] As we cover each topic, we will go into great detail to ensure that you understand the important points as they relate to each section of electrical grounding.

[1m:34s] Once all of the topics have been covered, we will offer a one comprehensive grounding overview video that can hopefully act as a great source for all of your common grounding questions.

[1m:46s] We are very excited to bring this new content to you and help you join us throughout this series. As always, if you have any questions or comments about the content we provide, please let us know in the comment section below or also by phone or email.

[2m:2s] We appreciate your participation and look forward to educating you more on this topic.

[2m:8s] For a full line of grounding equipment and thousands of other products, please go to our website. For more information or other educational videos, go to RSPSupply.com, the Internet's top source for industrial hardware. Also, don't forget: like and subscribe.
