TEMPERATURE  
TRANSMITTERS

# Temperature Transmitters

## T120 / T121

High precision temperature transmitters for head mounting, T120 and T121, are designed for universal use on machines, industrial plants, installations and in the process industry. They convert the input signals and transmit them back into a normalised current signal via a 4-20 milliAmpere loop. The input signals can come from 2, 3, 4-wire RTD sensors such as Pt100 (EN 60751) and Ni100 (DIN 43760). T121 model also acquires Cu50, Cu100, Ni121 and Ni1000 thermoresistances and signals from thermocouples type J, K, R, S, T, B, E, N, L (EN 60584), voltage and resistance. T120 and T121 are featured by reduced overall dimensions and connections via spring terminals. All available operating parameters can be configured using specific EASY SETUP / EASY LP software. ### HIGHLIGHTS

**OPERATING TEMPERATURE**  
-40..+85°C

**RESOLUTION**  
UP TO 16 BIT

**ACCURACY CLASS**  
0,1%

**SPRING CLAMPS CONNECTION**

**UNIVERSAL INPUT**  
RTD, TC, mV, Ω

**OUTPUT CURRENT LOOP / POWER SUPPLY**  
4..20 mA / 20..4 mA  
(2 wires); 5/7..30 Vdc

**CONNECTOR FOR FAST PROGRAMMING**

**CALIBRATED VERSIONS**

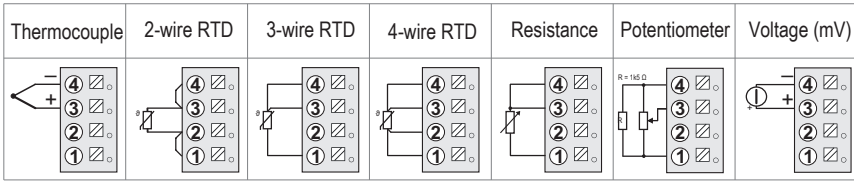

### DIMENSION

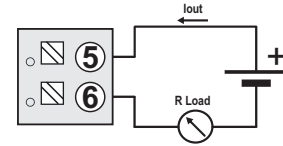

### PUSH-WIRE CLAMPS CONNECTION

## 2 / 3 / 4 WIRES CONNECTION

## OUTPUT / CURRENT LOOP

## PROGRAMMING

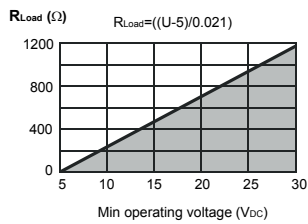

The configuration of T120 and T121 transmitters can be done through EASY USB device, which converts the USB serial signal from the PC into a serial UART TTL signal and vice versa, and EASY LP software. The transmitters can be configured even if not powered by 4..20 mA loop, taking power supply from the programming connector.

T120 and T121 transmitters can be configured via S117P1, USB - RS232 / TTL converter and EASY LP software. The transmitters can be configured even if not powered by 4..20 mA loop, taking power supply from the programming connector.

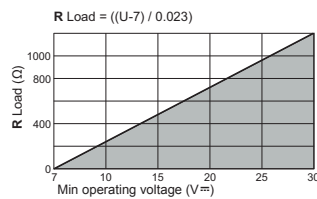

EASY SETUP / EASY LP software allows to configure T121 transmitter to linearise custom sensors within a certain working range. The curves of all the sensors managed are included in the software. There is also a tool to correctly configure the S311A indicator connected to the T121 transmitter.

# Temperature Transmitters

## T120

2 wire loop powered transmitter for Pt100 and Ni100 probes

## T121

Isolated loop powered temperature transmitter

GENERAL DATA		
Power supply	5..30 Vdc (loop powered)	7..30 Vdc (loop powered)
Isolation	-	1,5 kVac
Protection degree	IP20	IP20
Sampling period	100 ms (300 ms con reiezione 50/60 Hz)	300 ms
Frequency rejection	50 / 60 Hz (selectable)	>60 dB a 50 e 60 Hz
Response time	<220 ms (<620 ms with 50-60 Hz rejection)	< 620 ms
Accuracy class	0,1%	0,1% (min 0,1°C per RTD e 1°C per TC)
Thermal drift	< 100 ppm (30 ppm typical)	< 100 ppm (30 ppm typical)
Measurement conversion	16 bit	16 bit
Transmission error	Max between 0,1% full scale or 0,1°C	Max between 0,1% full scale or 0,1°C
EMI error	<0,5%	<0,5%
Operating tempereature	-40..+85°C	-40..+85°C
Connection	6 spring terminals for 0.2 to 2.5 mm <sup>2</sup> conductor section, suggested wire stripping 8 mm, 1 serial programming connector TTL with 4 pin.	6 spring terminals for 0.2 to 2.5 mm <sup>2</sup> conductor section, suggested wire stripping 8 mm, 1 serial programming connector TTL with 4 pin.
Case	PA6 reinforced with glass-fibre, black color	PA6 reinforced with glass-fibre, black color
Dimension	Ø 43,7 x 20 mm	Ø 43,7 x 20 mm
Weight	35 g	35 g
INPUT DATA		
Number of channels	1	1
