About Ericson Manufacturing

Over a century of innovation, experience and expertise has given Ericson the unique opportunity to offer the industry a comprehensive line of products, designed with exceptional worker safety in mind. Robust design and precision manufacturing set Ericson apart for quality products offering exceptionally long service life.

Ericson prides itself on building over 97% of it's products in the North America, giving our customers a reliable and secure supply line.

Our custom engineered products are designed to meet critical customer requirements for their most challenging applications and exceed their expectations, for highly engineered quality built products.

Thank you for considering Ericson Manufacturing products.

IEC 309 Pin & Sleeve Devices

Introduction

Ericson Manufacturing Company offers a comprehensive range of Pin & Sleeve Devices that meet IEC 309-2 specifications including UL 1682 and UL 1686 along with CSA C22.2 No. 182.1 standards for safety.

- Fully interchangeable with other manufacturers who conform to these standards.
- Watertight IP67 devices for wet locations.
- Splashproof IP44 devices for light industrial environments.
- Mechanical Interlocks available in both IP67 and IP44 constructions.

Watertight IP67 Devices

- Locking ring and gasket provides positive mechanical lock between male and female devices and receptacles to prevent intrusion of moisture, dirt and dust.
- Oversized ground contact and sequential early make, late break contact structure ensures safe connection and disconnection.
- Shrouded and recessed pins are protected from physical damage.
- Recessed contact sleeves protect from accidental touch potential.
- Color-coded devices prevent confusion with voltage ratings.
- External cable gland with “onion-ring” neoprene bushing assure watertight integrity.
- External cord clamp with bell housing to allow cord to exit at various angles without severing cable jacket.

Splash proof IP44 Devices

- Shrouded and recessed pins are protected from physical damage.
- Recessed contact sleeves protect from accidental encounter with live contacts.
- Color-coded devices prevent confusion with voltage ratings.
- External cable gland with “onion-ring” neoprene bushing assure watertight integrity.

Mechanical Interlocks

- Ensures that the plug is securely mated before electrical energy is supplied.
- Eliminates dangerous accidental disconnect under load.
- Units are NEMA and IP rated for use with IEC 60309 devices.
- Available with or without overload protection.
- Available in compact versions.
- Unique ground plate design. Allows top, bottom and side entry.
- Mechanical interlocks available with micro switch status indication.

Custom Built Power Distribution Unit & Cord Assemblies

Turn to Ericson to engineer a solution to meet your temporary application. Contact your Ericson Representative or applications team to learn more.

North American Voltage Ratings

Voltage AC (Except where noted)

Clockface Positions in Accordance with IEC 309-2 and UL 1686

2 poles - 3 wire (3-pole) Volt Clock position Color code	125 V AC 4 Yellow	250 V AC 6 Blue	277 V AC 5 Gray	250 V DC 3 White	480 V AC 7 Red
3 poles - 4 wire (4-pole) Volt Clock position Color code	125/250V AC 12 Orange	3Ø 250 V AC 9 Blue	3Ø 480 V AC 7 Red	3Ø 600 V AC 5 Black	
4 poles - 5 wire (5-pole) Volt Clock position Color code	3Ø Y120/208 V AC 9 Blue	3Ø Y 277/480 V AC 7 Red	3Ø 347/600 V AC 5 Black	50 to 600 V 400 Hz 2 Green	

Catalog Numbering System: Receptacles, Plugs, Connectors, and Inlets

Wires	Amperage Rating North American/ International	Device Type	Clock Position	Environmental Classification
3 4 5 7	20 30 60 100	P - Plug C - Connector R - Receptacle RA - Receptacle Angled B - Inlet BA - Inlet Angled MI - Mechanical Interlock	Clock position of Female Grounding Contact (when keyway groove is facing down)	W - Watertight S - Splashproof

International Configuration Devices available with ratings of 16A, 32A, 63A and 125 Amps; Consult factory for additional information.

IEC309-2 IP67 Pin & Sleeve Plug

Product Details

Electro Zinc Plated Steel Screws
Corrosion resistant captive screws

Internal Strain Relief

Designed to firmly grip not only the outer cable jacket but also the internal conductors. Eliminates strain on the terminals while providing high pull-out values. "Swing Away" feature provides easy access to terminal screws.

Locking Ring Gasket

Protects against intrusion of dirt, dust, and moisture when the male and female devices are connected.

Retaining Post

Holds the plug in position when it is in proper engagement with a connector or socket-outlet and prevents its unintentional withdraw.

Safe, Reliable Connections

IEC 60309-2 configurations for plugs (inlets) and receptacles (connectors) are single-rated which assures proper mating of devices with the same voltage and amperage. IEC devices are color-coded by voltage for added safety.

Shrouded Pins

Shrouded, nickel-plated, solid brass pins offer corrosion protection and excellent conductivity. They are recessed in the nylon housing protecting them from deforming due to physical abuse.

High Impact Thermoplastic

Heavy-duty industrial insulated housings are made from high impact nylon material which is resistant to corrosion and abrasions. Non-conductive material is UV stabilized to protect against warping or discoloration.

Double Terminal Screws

Double terminal screws create a large area of safe and secure contact between conductor and terminal. Screws are captive, easily accessible and supplied in the open position.

Solid Brass Pin & Sleeves

Low contact resistance and high conductivity. Long lasting, reliable electrical contact.

Clock Position (Earth Ground)

Position of earth ground contact with respect to the FEMALE key way groove. (7 o'clock position shown on plug.)

Keyway

IEC309-2 IP67, 309 Watertight Pin & Sleeve Connector

Watertight Devices

Product Details

Spring Loaded Gasketed Cover

Snaps into place when the plug is removed. Protects against encounter with live contacts while keeping out dirt, dust and moisture

Internal Strain Relief

Designed to firmly grip not only the outer cable jacket but also the internal conductors. Eliminates strain on the terminals while providing high pull-out values. "Swing Away" feature provides easy access to terminal screws.

Terminal Identification

Ground, neutral and phase terminals are clearly identified for easy recognition and ease of wiring

Watertight Locking Female Cover

Prevents moisture and contaminants from entering the receptacle sleeves

First Make/Last Break (FMLB)

Connectors ensure the ground path is established before any other power or signal connections are made preventing making or breaking the circuit under load.

Trumpet/Bell Gland

A compression type cable gland with onion ring and neoprene bushing which serves as a secondary method to prevent cable from being twisted or accidentally pulled out of the housing. Provides an airtight seal to keep out dust, dirt, and moisture that carries IP67 Splashproof rating.

Clock Position (7-Clock position shown)

Position of earth ground contact pin with respect to the FEMALE keyway groove

Keyway Groove

NOTE: For availability of straight back boxes, please contact the factory.

Cast Aluminum Junction Boxes for Watertight and Splashproof Receptacles

Epoxy-coated junction boxes are corrosion resistant and designed to pass the 500-hour salt spray test, UL hosedown and external icing test.

Watertight Closure Caps

for use with Watertight Male Plugs & Inlets

Mechanical Interlocks

Ericson offers a variety of Mechanical interlocks from 20-Amp through 100-Amp. Mechanical Interlocks combine a disconnect switch and receptacle into one device ensuring secure contact and preventing accidental disconnect underload. The safety mechanism within the enclosure prevents the switch from being turned to the "ON" position until the plug is fully inserted into the receptacle. Once fully engaged, the plug is locked into place when the switch is turned on and cannot be removed until the switch is turned to the "OFF" position. This prevents making or breaking the circuit under load. Ericson mechanical interlocks are also available with optional circuit breaker (see inset photo).

Mounting screw ports

located outside enclosure gasket for seal integrity.

Compact Size

All versions are designed to mount within an 8" column.

Easy Identification

The label includes catalog number, rating, and certifications to easily identify mating devices.

On/Off markings

Clearly visible On/Off markings indicate power status.

Compliance with OSHA Lockout Requirements

Ericson Mechanical Interlock handles can be locked in the "OFF" position to comply with OSHA lockout standards. The handle accepts up to a 5/16" padlock shaft

Watertight NEMA 4X, 12K Nonmetallic Enclosure

Ericson Mechanical Interlock enclosures are rated NEMA 4X,12K and resist abuse and corrosion.

Color Coded Receptacle Covers

Receptacle covers are color-coded by voltage in accordance with IEC 309 standards.

A Pre-Molded Offset Dimple

A pre-molded recessed dimple (drill point), provides the installer a range of input conduit size options. The grounding plate may be positioned at the conduit entry to ensure a secure ground connection.

Dry Contact Relay is available to signal switch position.

Swivel Mount Feet (135°)

Swivel mount feet can be used for a variety of installations.

Mechanical Interlocks without circuit breakers²

IP 67 Watertight¹

Notes:

1. Also available in IP44 splashproof models - contact factory for availability
2. Also available with circuit breakers - contact factory for availability

Mechanical Interlocks

Specifications and Listings

Electrical

Dielectric Voltage Withstand	3,000 Volts
Maximum Working Voltage	600 Volts RMS (switch version) 480 Volts RMS (circuit breaker version)
Current Interrupting	Certified for current interrupting at full rated current and voltage
Short Circuit Withstand Rating	Suitable for use on a circuit capable of delivering not more than 10,000 RMS symmetrical amperes at the voltage rating of the receptacle.
Operations	Mechanical: 10,000 cycles Electrical: 6,000 cycles

Mechanical

Impact Resistance	In accordance with UL 746C
Terminal Identification	In accordance with UL, CSA and international conventions
Product Identification	Identification, ratings and color code in accordance with UL, CSA and IEC requirements
Lockout/Tagout	"ON" and "OFF" lockout/tagout capability at switch handle. Complies with OSHA Reg. 29CFR 1910.147
Mounting	External adjustable feet

Materials

Enclosure (all exterior components)	UL94-5VA/V0, UV stabilized, impact components) modified Valox ^R
Contact Carrier	Molded arc resistant UL94-V0 thermoplastic
Gaskets	Neoprene or EPDM
Contacts (Watertight IP67)	Brass, Nickel Plated
Contacts (Splashproof IP44)	Brass
Hardware (screws & springs)	Steel with zinc-plated blue chromate or nickel plating

Approvals & Compliances

UL 508 (switch version) Motor Disconnect
UL 508 (compact version) Manual Motor Controller
UL 231 & UL 489 (circuit breaker version)
UL1682 & 1686
CSA C22.2 No. 14, 182.1
IEC 309-1 & IEC 309-2

Environmental

Moisture Resistance	Watertight IP67 (Washdown) - UL Type 4X Splashproof IP44
Flammability	UL94-5VA & V0 Classifications
Operating Temperatures	Maximum Continuous: 60°C (140°F) Minimum Continuous: -40°C (-40°F)
UV Resistance	UV stabilized material
Chemicals	Resists most standard industrial hydrocarbons, acids, bases and solvents

IEC 309 Pin & Sleeve Devices

IEC 309 Pin & Sleeve Devices

ELECTRICAL

Insulation Resistance 500V for 1 min. Resistance 5M
Dielectric Voltage Withstand 3000V for 1 min.
Ground Path Current See Table 1
Endurance, Connect and Disconnect Cycles See Table 2
Current Interrupting Certified for current interrupting at full rated current and voltage.
Overload Test Tested for current interrupting at (Power factor 0.75 - 0.80) 150% of the rated current and 100% of the rated voltage for 50 cycles.
Temperature Rise Maximum 30° C rise at full rated current (after overload).
Resistance to Arcing Continuation of overload test for an additional 200 cycles.

MECHANICAL

Mold Stress Relief 70°C (158°F) for 7 hours.
Humidity 32°C (89.6°F), 93% humidity for 7 days (168 hours).
Cable Secureness See Table 3
Impact A device is wired with a 90" (2300mm) length of flexible cord and dropped from 30" (760mm) 8 times. The device is then conditioned for 6 hours at -25°C and immediately subjected to a repeated impact test.
Crushing 250 lbs for 1 minute. The device is then conditioned for 6 hours at -25°C and immediately subjected to a repeated crushing test.
Withdrawal Force See Table 4
Strength of Insulating 110% of specified tightening
Base and Support torque on terminal screws.
Polarization Integrity Matching devices will not mate so that the ground is energized, even when polarization feature is removed and 40 lb (180 N) insertion force is applied.

ENVIRONMENTAL

Flammability V-2 or better per UL 94 or CSA 22.2 No. 0.6
Ambient Temperature Minimum: -25°C (-13°F) with impact
Range Maximum: 90°C (194°F)
Resistance to Corrosion Ferrous parts immersed for 10 min. in 10% solution of ammonium chloride at a temperature of 20°C.
Moisture Resistance Watertight (IP67): Device immersed for 24 hours in water at a temp. of 25°C, the highest point of the device being 2" (5cm) below the water level.
Splashproof (IP44): Device is sprayed with water for 10 minutes and immediately afterwards subjected to splashing water in all directions (360°).
UV Resistance Exposed plastic materials are UV stabilized.

These products are Listed to applicable UL Standards and requirements by Underwriters Laboratories Inc. UL 1682 and UL 1686.

Table 1

Ground Path Current Test				
Device Rating Amperes	Minimum Size Grounding Conductor		Times, Seconds	Test Current, Amperes
	AWG	mm ²		
20	12	3.3	4	470
30	10	5.3	4	750
60	10	5.3	4	750
100	8	8.4	4	1180

A test current that far exceeds the device rating, is passed through the mating devices and grounding wires.

Table 2

Endurance Test			
Device Rating Amperes	Cycles with Load at Rated Current and Voltage	No-Load Cycles	Sequence
20	5000	0	-
30	1000	1000	Alternating
60	1000	1000	Alternating
100	250	250	Alternating

The test sequence is conducted by using a no-load, followed by a load sequence. The power factor of the load is 0.75 to 0.80.

Table 3

Ground Path Current Test						
Device Rating Amperes	Minimum Size Grounding Conductor		Torque		Maximum Displacement	
	lb.	N	ft-lb	N•m	In.	mm
20	30	133	0.54	0.54	3/32	2.38
30	75	333	0.68	0.68	3/32	2.38
60	150	667	1.4	1.4	3/32	2.38
100	150	667	2.7	2.7	3/32	2.38

The flexible cord or cable is simultaneously twisted and pulled. Values for the applied twisting torque and force of pull are shown in Table 3. In all cases the cord displacement is less than 3/32 inches.

Table 4

Ground Path Current Test						
Device Rating Amperes	Minimum Size Grounding Conductor		Torque		Maximum Displacement	
	lb.	N	ft-lb	N•m	In.	mm
20	30	133	0.54	0.54	3/32	2.38
30	75	333	0.68	0.68	3/32	2.38
60	150	667	1.4	1.4	3/32	2.38
100	150	667	2.7	2.7	3/32	2.38

The pressure exerted by mating contacts of a plug and connector must be sufficient to prevent unintentional withdrawal during normal use. During the test, any locking rings or retaining means are not to be engaged.

IEC 309 Pin & Sleeve Devices

IP Rating System

TABLE 1 - CHARACTERISTICS DEFINED BY THE CEI 70-1 - IEC 529 - IEC 144 - UTE C 20-010 - DIN 40050 STANDARDS

First Digit - Protection against persons - touching and ingress of solid foreign objects		Second Digit - Protection Against the Penetration of Liquids								
		IP_0	IP_1	IP_2	IP_3	IP_4	IP_5	IP_6	IP_7	IP_8
		Non Protected	Protection against vertical falling of water drops	Protection against falling of water drops at an angle up to 15° from the vertical	Protection against spraying water (rain) at an angle up to 60° from the vertical	Protection against water jets from any direction (360°)	Protection against water jets from any direction (360°)	Protection against heavy seas (waves)	Protection against effects of immersion in water under defined conditions of pressure and time	Protection against continuous submersion in water
										
IP 0_	Without protection	IP 00								
IP 1_	Protection against touching with the hand and solid objects greater than 50mm dia.	IP 10	IP 11	IP 12						
IP 2_	Protection against touching with the finger and solid objects greater than 12mm dia.	IP 20	IP 21	IP 22	IP 23					
IP 3_	Protection against touching with tools, wires, etc. more than 2.5mm thick and solid objects greater than 2.5mm dia.	IP 30	IP 31	IP 32	IP 33	IP 34				
IP 4_	Protection against touching with tools, wires, etc. more than 1mm thick and solid objects greater than 1mm dia.	IP 40	IP 41	IP 42	IP 43	IP 44				
IP 5_	Unlimited protection against contact with live parts and damaging deposits of dust	IP 50				IP 54	IP 55			
IP 6_	Unlimited protection against contact with live parts and any penetration of dust	IP 60					IP 65	IP 66	IP 67	IP 68

In some countries a third digit (for mechanical security) is added.

NEMA Standard

Designation	Intended Use and Description	Construction Requirements
3	Outdoor use primarily to provide a degree of protection against rain, sleet, windblown dust and damage from external ice formation.	Splashproof (IP44)
4	Indoor and outdoor use primarily to provide a degree of protection against windblown dust Watertight (IP67) and rain, splashing water, hose-directed water and damage from external ice formation.	Watertight (IP67)
4X	Indoor and outdoor use primarily to provide a degree of protection against corrosion, windblown splashing water, hose-directed water and damage from external ice formation.	Watertight (IP67)
6	Indoor and outdoor use primarily to provide a degree of protection against hose-directed water, and the entry of water during occasional temporary submersion at a limited depth and damage from external ice formation.	Watertight (IP67)
12, 12K	Indoor use primarily to provide a degree of protection against circulating dust, falling dirt, and dripping non-corrosive liquids.	Splashproof (IP44)

This information is provided only as a general guide. No specific recommendation is intended. As each application may vary, testing should be conducted by the user in the intended environment.

IEC Cordsets

IP67 Watertight

20-30A

Ericson manufactured cordsets are built to the highest quality standards for durability and long service.

- Rugged SOW cord
- Internationally rated IEC plugs and Connectors
- Pigtail cordsets allow for direct wire.

IEC 309 Pin & Sleeve Devices

Plug

Assembly Screws*	Steel, Electro Zinc Plated
Friction Ring*	Steel, Electro Zinc Plated
Gland Cap	Polycarbonate Blend
Grommet	Solid Neoprene
Housing (Front and Back)	Type 6 Nylon
Internal Cord Clamp	Type 6 Nylon
Locking Ring	Type 6 Nylon
Pins (Watertight)	Brass, Nickel plated
Pins (Splashproof)	Brass
Sealing Gasket	Neoprene
Terminal Screws	Steel, Nickel Plated

Inlet

Housing Type	6 Nylon
Locking Ring Type	6 Nylon
Mounting Flange Type	6 Nylon
Pins (Watertight)	Brass, Nickel plated
Pins (Splashproof)	Brass
Sealing Gasket	Neoprene
Terminal Screws	Steel, Nickel Plated

* Stainless steel available upon request

Manufacturing pin & sleeve devices, of superior quality, can only be accomplished through the use of high grade materials. That is an important part of the Ericson Pin & Sleeve system - quality products you can depend on.

Male pins and female sleeves are made of high conductivity brass. Contacts used with watertight devices are nickel plated to prevent corrosion. The insulated housing is made from a high impact, nylon material. The non-metallic device, while resistant to most solvents, chemicals and salt water, is also non-conductive, which enhances the safety of the product.

Application Guide

Industry	Application
Food Processing	Areas where wash downs are common and heavy abuse of connections occur.
Food Service	Indoor service where subject to water, chemicals and cleaning agents.
Outdoor Events & Temporary Power Setups	Concerts, carnivals, sporting events, street fairs, entertainment districts where outdoor connections are required and subject to rain, snow, mud & critical loads mandate a secure connection such as lighting and sound systems.
Chemical Processing	Where subject to rough use, water/possible immersion & corrosion.
Construction Sites	Outdoors where subject to severe weather conditions, wet grounds.
Pulp/Paper Mills	Where subject to rough use, water/possible immersion & corrosion.
Marinas	Where subject to rough use, water/possible immersion & corrosion.
Plant Maintenance & Repair	Where subject to rough use, water/possible immersion & corrosion, dust, metal chips, coolants or exposed to vibration and rough handling.
Agriculture	Outdoor connections for electrically powered equipment such as fans, pumps and heaters
Wastewater Treatment	Flood-prone areas, outdoor connections for electrically powered equipment.
Computer Installation/ Maintenance Repair	Connections under raised floors subject to liquid exposure & for critical loads that require a secure connection.
Machine Build/Repair	To mate with or replace factory-wired devices on imported equipment. OEM assembly onto machinery built for export.

Connector

Assembly Screws*	Steel, Electro Zinc Plated
Cover Type	6 Nylon
Cover Fastener	Nickel Plated Brass, or Macrolon
Friction Ring*	Steel, Electro Zinc Plated
Gland Cap	Polycarbonate Blend
Grommet	Solid Neoprene
Housing (Front and Back)	Type 6 Nylon
Internal Cord Clamp	Type 6 Nylon
Sealing Gasket	Neoprene
Sleeve Spring	Steel, Nickel Plated
Sleeves (Watertight)	Brass, Nickel Plated
Sleeves (Splashproof)	Brass
Terminal Screws	Steel, Nickel Plated

Receptacle

Cover	Type 6 Nylon
Cover Fastener	Nickel Plated Brass, or Macrolon
Cover Spring	Stainless Steel (A2)
Housing	Type 6 Nylon
Mounting Flange	Type 6 Nylon
Sealing Gasket	Neoprene
Sleeve Spring	Steel, Nickel Plated
Sleeves (Watertight)	Brass, Nickel Plated
Sleeves (Splashproof)	Brass
Terminal Screws	Steel, Nickel Plated
