

Influence of the ambient temperature to the time/current-characteristics:

ambient temperature	multiplication factor
-30 °C	0.76
-20 °C	0.79
-10 °C	0.83
0 °C	0.88
+10 °C	0.93
+23 °C	1.00
+30 °C	1.04
+40 °C	1.12
+50 °C	1.22
+60 °C	1.35

In case of series assembly, the nominal current can only be led up to 80 %.
